

# Changelog

## 20.9.2025

- Added the habit "Power used by mandatee" for easy power usage tracking using the penalty system
- Changed the default behavior to allow multiple pillories (with small cool-down)
- Modified Vox Populi template to be more descriptive and fixed typos

## 13.11.2025

- UI redesign to make KeyShare more visually attractive
- KeyShare Bookmarks
- Ability for the wearer to delegate mandate signing to the keyholder
- Internal blocking reasons rework
- Power disabling based on lock state conditions
- Auto power disabling - one-click disabling of powers with actions that would have no effect
- Per-power limits, cooldowns, and goals (both per user and/or shared)
- Minimum and maximum time for add/remove time actions
- Timer visibility actions
- Temporary actions (temporary hide/unhide timer, freeze/unfreeze, block/unblock)
- Option for the mandatee page so that timer visibility follows the actual timer visibility
- Social preview takes more settings into account (i.e., hiding keyholder/wearer info)
- Ability to switch the link to a new mandate (for example new mandate version without changing the link)
- Ability to delete link permanently
- "Take me to random public KeyShare" for users wanting more "traffic" on their lock

## 17.11.2025

- Ability to publish (not unpublish!) self locks to the "Take me to random public KeyShare" pool
- Better cleanup of invalid links from the "Take me to random public KeyShare" pool

4.12.2025

- Rewards/penalties for using powers
- homepage for KeyShare management without a lock (bookmarks for now)

1.6.2025

- The names (if present) on the Link overview page are links to chaster
- The ability to export/import mandates
