

Mandatee Guide

What is a Mandatee?

A **mandatee** is someone who has received a KeyShare link that allows them to perform specific actions on someone else's chastity lock. You don't need a Chaster account or any special setup - just the link.

Understanding the Link

When someone shares a KeyShare link with you, they're granting you **limited control** over their chastity device lock. This isn't unlimited power - everything you can do is pre-defined and bounded by the person who created the mandate.

What You're Controlling

A **chastity lock** in Chaster is a digital timer that controls when someone can unlock their physical chastity device. The lock: - Has a countdown timer showing time remaining - May be frozen (paused) or active (counting down) - Can have time added or removed - Prevents the wearer from removing their device until it expires

Your Role

As a mandatee, you can: - Execute predefined "powers" that affect the lock - View permitted information about the lock status - See the results of your actions immediately

You **cannot**: - Access the wearer's full Chaster account - Perform actions outside the granted powers - See information that's been hidden from you - Bypass any limits set in the mandate

Using a KeyShare Link

Accessing the Link

1. Click or paste the KeyShare link in your browser
2. The page loads showing the available controls
3. No login or account creation required

Interface Overview

The KeyShare interface shows:

Lock Information (if visible)

- **Remaining Time:** How much time is left on the lock
- **Status:** Whether the lock is active, frozen, etc.
- **Participants:** Wearer and keyholder information (if permitted)

Available Powers

Each power appears as a button with: - **Power Name:** What the action is called - **Description:** What it's supposed to do - **Action Details:** Specific effects (if not hidden)

Executing Powers

1. **Read the Description:** Understand what the power does
2. **Click "Use Power":** Some powers may ask for additional parameters
3. **Confirm Action:** Review and confirm your choice
4. **View Results:** See the immediate effect on the lock

Actions Are Immediate

When you click "Use Power", the action happens immediately and cannot be undone. Make sure you understand what you're doing.

Understanding Power Types

Simple Powers

Execute immediately with predefined effects: - "Add 1 Hour" - increases lock time by exactly 1 hour - "Freeze Lock" - pauses the countdown - "Remove 30 Minutes" - decreases lock time

Complex Powers

May execute multiple actions together: - "Punishment" - might add time AND freeze the lock - "Reward" - might remove some time but add a small freeze - "Random Effect" - could have unpredictable results

Parameterized Powers

Ask you for additional input: - "Add Time" - you choose how much time to add (within limits) - "Custom Message" - you provide text to send to the wearer

Information Visibility

Depending on the mandate settings, you may see any combination of:

- Wearer's username and profile
- Keyholder's information
- Exact lock status and timing
- Detailed action effects

Anonymous Links

If you received an anonymous link, the person wanted to maintain privacy while still letting you have some control. Respect this by not trying to identify them through other means.

Common Scenarios

Trusted Friend Control

You know the person well and have been given specific powers to help or tease them:

- Use powers responsibly based on your relationship
- Consider their limits and preferences
- Communication outside the link is expected

Community/Forum Links

Shared in online communities for random interactions:

- Be respectful and considerate
- Don't abuse the privilege
- Understand this affects a real person

Anonymous/Random Control

You don't know who the person is: - Use powers as intended - Don't try to identify the person - Respect the anonymous nature

Punishment/Reward Systems

Part of a structured dynamic:

- Follow any external rules or guidelines
- Use appropriate powers for the situation
- Understand the context if provided

Etiquette and Best Practices

Do:

- Read all descriptions carefully before acting
- Respect any limits or guidelines provided
- Use powers thoughtfully and responsibly
- Understand that your actions affect a real person
- Report any technical issues appropriately

Don't:

- Share the link without permission
- Try to circumvent restrictions
- Abuse the powers maliciously
- Attempt to identify anonymous wearers
- Use powers you don't understand

Technical Considerations

Link Validity

- Links may expire or become inactive
- The lock session ending invalidates all links
- Mandates can be revoked by keyholders

Action Limits

- You may hit daily or total usage limits
- Global limits prevent excessive actions

- Some powers may become unavailable

Connection Issues

- Refresh the page if actions don't register
- Check your internet connection
- Actions may take a few seconds to process

Safety and Ethics

Consent

- The wearer has explicitly consented to your control
- Limits are set for safety and comfort
- Respect the boundaries established

Responsibility

- Your actions have real consequences
- Be considerate of the person you're affecting
- Don't abuse the trust placed in you

Privacy

- Don't screenshot or share interface details
- Respect privacy settings and anonymous setups
- Keep any personal information confidential

Important

Remember that chastity play involves real physical devices and psychological elements. While the digital lock is "just software," it controls access to someone's body. Always act responsibly and ethically.

Troubleshooting

Link Not Working

- Check that you have the complete URL

- Try refreshing the page
- The link may have expired or been revoked

Powers Not Responding

- Ensure stable internet connection
- Try refreshing and clicking again
- You may have hit usage limits

Unexpected Results

- Actions work exactly as programmed
- Check if there are global limits affecting the result
- Some effects may have delays

Questions or Issues

- Contact information may be provided with the link
- Technical issues should be reported appropriately
- Respect communication preferences of all parties

Understanding Limits

All KeyShare mandates include various limits for safety:

Time Limits

- Maximum time that can be added/removed
- May be per-action or cumulative
- Prevents extreme modifications

Usage Limits

- Daily action limits
- Total usage caps
- Cooldown periods between actions

Scope Limits

- Only specified actions available
- No access to other lock features
- Cannot modify the mandate itself

These limits ensure that even with control, the effects remain within acceptable bounds set by the wearer and keyholder.

Account-Required Mandates

Some mandates may require you to have a registered Chaster account before you can use them. If you encounter a link that asks for Chaster account registration:

Quick Registration Options

Option 1: OAuth Registration (Recommended) 1. Click the registration link provided in the error message 2. Choose "Login with Chaster" on the registration page 3. Authorize KeyShare to access your Chaster username 4. Return to the original link - it should now work

Option 2: Manual Registration 1. Create a temporary lock with KeyShare extension enabled 2. Access the KeyShare extension page during your session 3. Click "Register account with KeyShare" 4. Return to the original mandate link

Per-Browser Registration

Registration is stored locally in your browser, so you'll need to register separately on each device/browser you want to use KeyShare with.

For detailed registration instructions, see the [Chaster Account Integration](#) documentation.

You are participating in consensual adult activities. Always respect boundaries, act responsibly, and remember that your actions affect real people.
